Certificate in Safety Leadership

Taught by safety consultant and author David Lynn
EVT 574 \$899

Is your safety team performing at their highest possible level of focus and commitment? This new certificate program taught by David Lynn provides a roadmap to build or enhance a culture that believes you CAN work injury-free. The Certificate in Safety Leadership consists of a five-month program that meets for one eight-hour session each month. It is designed for employees who have safety responsibilities who want to increase their leadership skills. Is not just for safety professionals.

An effective safety program requires leadership and employee engagement throughout an organization. From the plant manager to the safety professional to front-line workers with assigned safety responsibilities, the Certificate in Safety Leadership will provide a means to develop safety champions and a framework for improving their existing safety programs. Participants will have the opportunity to use a gap analysis scorecard to evaluate their existing safety program and move the bar from good to great for their company's safety initiatives.

Textbook: Principle to Practice ISBN-13: 978-1934866153
(must be purchased separately call Greenville Tech Bookstore at)

FEEDBACK FROM PARTICIPANTS:

"David's style of teaching kept me interested. His examples/stories helped illustrate how to put principles in use at my site. Hearing the other students' experiences was priceless."

Jacqueline Heard, Patheon, Greenville, SC

"Sharing presentations was valuable in seeing different ways to accomplish similar goals."

Kenny Frey, Duer/Carolina Coil, Inc.
